

## PRODUCT DESCRIPTION

The 0171Q & 0172Q Directional Zero Speed Sensor provides a square wave quadrature signal at Frequency A and Frequency B outputs and contains internal decoding logic to determine Clockwise/Counterclockwise direction. The direction information is available as a logic level at the direction output. Operation is consistent down to zero speed.

The standard output is NPN Supply Tracking 0-Vs, provided from a 3.1k Ohm internal pull-up resistor to a collector, which can sink up to 25 mA. The output is normally high with no target present. Other output signal options are available such as 5V TTL compatible and Open Collector. Please see Page 2 for details.

For intrinsically safe versions refer to bulletin: IS170 & IS171  
 For Non-Incendive versions refer to bulletin: N170 & N171
